Tasks

The main goal of ETBF's Technical Committee is to make our sport more professional and thus to improve the sport of bowling.

A member of ETBF's Technical Committee will inspect the lanes in a period before and again just before each of ETBF's Championships. When the lanes are approved, the centre will be certified by ETBF.

Another important task for ETBF's Technical Committee is to share the knowledge with those, who are willing to learn. ETBF's Technical Committee is therefore offering clinics for:

Lane inspection and certification (3 days)

Lane maintenance (3 days)

If a federation wants to have a technical clinic in their country, the federation must pay the flight ticket, the hotel accommodation and the per diems for the member of the ETBF Technical Committee holding the clinic.
